

Letter of Recommendation

30 Lenin Avenue, Kaliningrad,
Kaliningrad Region,
236006, Russia

July 30, 2025

We had the pleasure of working with Artem Prokhorov, a freelance UX/UI designer, from February 17 to July 30, 2025, on the development of our internal automation platform at Staffjet — a CPA affiliate network in the HR and performance marketing space.

Artem led the complete UX/UI process for a system that allows advertisers to submit job placement requests, which Staffjet then processes entirely within the platform — from request creation to campaign execution and final reporting. He was responsible for user research, journey mapping, wireframes, prototypes, and high-fidelity UI, while also building a consistent and scalable design system.

Throughout the project, Artem collaborated closely with our product and marketing teams to ensure the platform met both business goals and user expectations. His work helped streamline operations, improve request handling, and reduce friction for internal users and advertisers alike.

He was organized, communicative, proactive in problem-solving, and receptive to feedback — a truly valuable design partner. We'd gladly work with Artem again and recommend him to any team looking for a thoughtful and skilled UX/UI specialist.

Sincerely,

Natalia Malysheva
CEO, Staffjet
